WEAK ARCHED FEET.

WEAK ARCHED FEET,

A SORE HEEL IS THE FIRST SYMPtom of a falling arch (flat foot) and
is known in medicine as a specific
silment, viz.; "policeman's heel;"
While not at first slarming, it soon
grows severe and indicates a serious
condition of the foot. Any one so
affilieted may become a cripple unless
by proper mechanical devices the
arch of the foot is upheld for a time
and the pressure on the heel from the
weight of the body relieved. This
very painful condition of the foot
is often wrongly diagnosed as rhenmatism or gout. The foot-rest will
quickly relieve the pain and by retaining the bones of the arch in proper position, will eventually cure. Persons standing on their feet continually, or having to walk much, will
appreciate this appliance as restful
to the feet. Not being fastened in
the shoe it is castly interchangeable.
